Roger,

Thanks for checking into that about the landfill. I see it as Local Landfill in the reports.

I'd also appreciate it if you'd check on the possibility of PFOA production at Washington Works at anytime in the past. I also thought all of their PFOA originally came from 3M and DuPont only started making themselves (in Fayetteville) when 3M got out of long-chain production in 2001.

Thank you very much,

Andy

Jenny and others. The "local landfill" had been owned and operated originally by DuPont and now Chemours. The local landfill is located directly south of the Washington Works facility. Among other wastes, the landfill received PFOA laden sludges from the Washington Works. I don't believe the landfill is still active, but will verify this with Andrew Hartten if I can reach him today. I will let everyone know what I learn.

Roger

Enforcement confidential and deliberative. Do not release for FOIA or discovery.

Hi Sarah,

You are welcome, but before you change the name of the landfill, I am copying Roger because there might be a landfill named that. I don't know. Roger, is there a landfill by DuPont called Local Landfill?

Sorry, this name is silly to me. It is similar to naming a dog Dog. Each to his own I guess?

Have a good afternoon,  
Jenny

**Subject:** Re: Quick Minor Edit to the PFAS RARE Grant Presentation

Hi Jenny,

Thanks your comments, both before and after our presentation! Just to clarify, my understanding was that there was a Local Landfill (the actual name of the landfill, not just a nearby landfill) owned by DuPont/Chemours that was located very close to Washington Works, so I thought that would be a proper noun. It seems like I'm mistaken though so I will gladly change it from a proper noun to a common noun without a capitalized name.

Also, great point on the maps. I've seen them so much that I've lost much of my objectivity so another perspective is always helpful.

Thanks!

Best,

**Sarah Lanier**

**Subject:** Quick Minor Edit to the PFAS RARE Grant Presentation

Hi Theresa, Sarah, and Marina,

Good presentation and great work! Thank you for giving it to us today.

I have a very minor comment. On the slide where you talk about landfills, the word local needs to be small.

Also, please don't forget to change the concentric blue circles to a brighter blue so they can be differentiated from the gray.

Great job again,  
Jenny
